

Cover Letter - Position - the role

Dear Hiring Team,

I am applying for the role. My CV shows experience across product definition, business analysis, API-driven workflows, bulk data ingestion, and functional system analysis.

The most relevant CV-backed points for this role are:

- API analysis (REST / SOAP) _(source: cv.md:23)_
- Agile (SAFe) _(source: cv.md:31)_
- Gap analysis _(source: cv.md:35)_
- Process documentation _(source: cv.md:53)_

I would welcome the opportunity to discuss how this experience could support Position.

Kind regards,

Akash Kotkar
