Summary

Technical Product Analyst with 5+ years of experience working on complex, data-intensive platforms across hospitality-tech, fintech, and ecommerce.

Core Skills

API analysis (REST / SOAP) | Agile (SAFe) | Gap analysis | Process documentation | Bulk data ingestion designs | API integration | Cross-system data consistency | RCA on production issues | JSON / XML payload validation | ETL workflow validation

Work Experience

Product Definition Analyst at Amadeus (Astek)

Aug 2024 - Present

- Acted as the key liaison between product, engineering, and QA to triage functional/data/technical issues.
- Mentored developers and QA while strengthening E2E testing with detailed scenarios and edge-case coverage.
- Enabled scalable handling of complex hotel pricing structures with thousands of rate/price plans.
- Designed API workarounds and improved Excel template logic to ensure smooth customer operations.

Business Analyst at Finwizard Technology

Oct 2022 - Mar 2024

- Built reconciliation logic for BSE/NSE datasets and implemented data cleansing protocols.

Technical Project Manager at IMT Atlantique

Dec 2020 - Apr 2022

- Coordinated cross-functional collaboration across technical, administrative, and research teams to keep project delivery smooth and structured.

Education

- MSc Management & Optimization of Supply Chain, Transport | IMT Atlantique, Nantes, France | Sep 2018 - Dec 2020
- Bachelors of Mechanical Engineering | S.P.P.U.-Pune University, Pune, India | Jun 2013 - July 2017

Key Impacts

- Supported data operations for 6,000+ hotels with highly complex pricing structures through high-volume bulk updates (thousands of API calls per upload) via structured data workflows.
- Reduced root cause identification time from approximately 2 days to 2-3 hours for production issues.
