Hiring Team

UrlCo

Subject: Application for API Product Owner

Dear Hiring Team,

I am writing to apply for API Product Owner at UrlCo. I am a Technical Product Analyst and Product Definition Analyst with 5+ years of experience across API-driven platforms, business analysis, and product/system analysis, with experience spanning hospitality tech, fintech, and ecommerce.

My current work at Amadeus through Astek is closely aligned with this opportunity: I work on bulk data ingestion, REST/SOAP API analysis, JSON/XML validation, functional documentation, and issue resolution across product, engineering, QA, and business stakeholders. Acted as the key liaison between product, engineering, and QA to triage functional/data/technical issues. Managed multi-stakeholder technical projects, aligning deliverables with EU/academic requirements and ensuring on-time execution through KPI, risk, and milestone tracking. I would bring the same structured approach to understanding requirements, clarifying system behavior, and supporting reliable delivery for UrlCo.

I can help UrlCo create clearer links between product intent, engineering implementation, QA validation, and business outcomes, while improving issue resolution, data reliability, and scalable operational workflows. Thank you for your time and consideration. I would welcome the opportunity to discuss how my background can support your team.

Sincerely,

Akash Kotkar
